Important Information for Cassette Users

Note: Model III BASIC on the TRS-80 Model III is essentially the same as Level II BASIC on the TRS-80 Model I. All of the following references to Level II BASIC also refer to Model III BASIC. The only difference is that a higher baud rate for saving onto tape can be set if you have a Model III with Model III BASIC (high = 1500 and low = 500). Both low and high baud rate use the same volume setting on the Model III.

Using Your Cassette Deck

Many factors affect the performance of a cassette system. The most significant one is volume. Too low a volume may cause some of the information to be missed. Too high a volume may cause distortion and result in the transfer of background noise as valid information.

Four different cassette models have been supplied with the TRS-80 system—the CTR-40, CTR-4I, CTR-80, and CTR-80A. Each model has its own loading characteristics. The table below gives the suggested volume ranges for each of the CTR models.

Notice that the volume ranges for Level I and Level II are different. This is because the Level II data transfer rate is faster (500 baud vs. 250 baud). Also, notice that for the TRS-80 Model I, pre-recorded Radio Shack programs need a slightly higher volume setting than that required by your own CSAVED tapes. This is because the pre-recorded tapes are produced with high-speed audio equipment at a slightly lower volume level than the CSAVE process provides. The Model III records at a lower volume than the pre-recorded tapes are recorded at, so the volume setting for user-generated tapes is higher than for pre-programmed tapes. You will need to take this into account when CLOADing Level II programs into a Model III.

Recorder Model	User-Generated Tapes		Pre-Recorded Radio Shack Tapes	
	LEVEL I	LEVEL II	LEVEL I	LEVEL II
CTR-40	YELLOW LINE	RED LINE	YELLOW LINE	RED LINE
CTR-41	6-8	4-6	6.5-8.5	5-7
CTR-80 & CRT-80A	4.5-6.5	3-5	5.5-7.5	2.5-5

**Recommended Volume Settings for Radio Shack Cassette Decks
When Used with the TRS-80 Model I**

Recorder Model	User-Generated Tapes	Pre-Recorded Radio Shack Tapes
CTR-80, CTR-80A	5-7	4-6

**Recommended Volume Settings for Radio Shack Cassette Decks
When Used with TRS-80 Model III**

(With the CTR-40, CTR-80, and CTR-80A, turn the control to the left to increase volume. With the CTR-41, turn the control to the right.)

When information is being loaded from the cassette tape, two asterisks will appear on the screen. The one on the right will flash on or off as the program is read in. If the asterisks do not appear, or the one on the right does not flash, then the volume setting is probably too low. Increase the volume and try again. If you have a Model III this may be an indication that the tape's baud rate is different than the Computer's baud rate. (All Radio Shack Model I Level II pre-recorded cassettes are recorded at 500 baud rate, so Low baud rate must be selected when they are loaded on the Model III.) Try resetting the baud rate from high to low or vice versa (See your Operation Manual).

Use the reset button to stop the cassette and return control to you if loading problems occur.

Radio Shack programs are recorded at least twice on each tape. Following this practice when you record programs on tape will give you a back-up if one does not load properly or if it becomes damaged.

Important Note: The CTR-41 requires that you keep the supplied "dummy plug" in the MIC jack at all times. However, the other models should never be used with the "dummy plug."

Level I

Sometimes you will get an error message during an attempted CLOAD. This means that some information was lost or garbled. Adjust the volume level slightly and try again.

Level II (Also Model III BASIC)

In case of an error message, proceed as above. In Level II, there is also a rare case in which the program is not loaded correctly even though no error message is generated. So, after CLOADing a program, be sure to LIST it. If some data was garbled, then at some point in the listing the display will be filled with meaningless words and characters. Adjust the volume and try again.

Hints and Tips

Computer tapes should be stored in a relatively dust-free area (a cassette case is recommended) and protected from high temperatures. Magnetic and electrical fields may alter recorded information, so avoid placing the tape near them

(i.e. household appliances, power sources such as transformers and television sets, etc.).

The cassette deck supplied with the TRS-80 is very compatible with the system and will perform its duties with great success. To keep the cassette deck in top condition and thus minimize your problems, you should periodically perform some routine maintenance on it. Dirty heads can cause as much as a 50% loss of volume. Also, heads become magnetized with use and may cause distortion. We recommend that you clean the head, capstan, and pinch roller after every four hours of operation. Heads on new recorders should always be cleaned before use.

Note: Cassette cleaning and demagnetizing accessories are available from your local Radio Shack store.

IMPORTANT NOTICE

ALL RADIO SHACK COMPUTER PROGRAMS ARE LICENSED ON AN "AS IS" BASIS WITHOUT WARRANTY.

Radio Shack shall have no liability or responsibility to customer or any other person or entity with respect to any liability, loss or damage caused or alleged to be caused directly or indirectly by computer equipment or programs sold by Radio Shack, including but not limited to any interruption of service, loss of business or anticipatory profits or consequential damages resulting from the use or operation of such computer or computer programs.

NOTE: Good data processing procedure dictates that the user test the program, run and test sample sets of data, and run the system in parallel with the system previously in use for a period of time adequate to insure that results of operation of the computer or program are satisfactory.

RADIO SHACK SOFTWARE LICENSE

A. Radio Shack grants to CUSTOMER a non-exclusive, paid up license to use on CUSTOMER'S computer the Radio Shack computer software received. Title to the media on which the software is recorded (cassette and/or disk) or stored (ROM) is transferred to the CUSTOMER, but not title to the software.

B. In consideration for this license, CUSTOMER shall not reproduce copies of Radio Shack software except to reproduce the number of copies required to use on CUSTOMER'S computer (if the software allows a backup copy to be made), and shall include Radio Shack's copyright notice on all copies of software reproduced in whole or in part.

C. CUSTOMER may resell Radio Shack's system and applications software (modified or not, in whole or in part), provided CUSTOMER has purchased one copy of the software for each one resold. The provisions of this software License (paragraphs A, B, and C) shall also be applicable to third parties purchasing such software from CUSTOMER.

Additional Information on Loading Lessons

Each lesson or sub-segment may be studied or reviewed at any time. To stop a lesson, or go to a sub-segment, press the **BREAK** key. When **READY>__** appears, type: **CLOAD** and press **ENTER**. The next sequential sub-segment will load.

After the computer has loaded the lesson or sub-segment, **READY>__** will appear again. Either type: **CLOAD** and press **ENTER** again (to advance to the next sub-segment) or type: **RUN** and press **ENTER** to run the program. You must press **ENTER** after responding to questions that appear on the screen.

Note: The lesson name is not required when using the **CLOAD** command. It is given for reference purposes only.

Introduction 1

Lessons 3

Loading the Lessons 9

*** IMPORTANT NOTICE ***

This program is designed for use only with the Model III Computer. It will not work on the Model I Computer. The tapes included in this package are recorded at the High 1500 Baud rate, which will only load on a Model III. (See Loading Instructions.) Do not try to use this program on a Model I.

Introduction

The BASIC Course consists of Model III tapes which contain a beginning course in Model III BASIC. This course does not assume any previous experience with BASIC.

The lessons are designed so that you will be able to write simple programs within a matter of minutes. By using the BASIC Course and your Model III Operation and BASIC Language Reference Manual, you should be able to write programs in BASIC. This BASIC Course is intended as a primary aid in learning BASIC.

The computer offers a unique advantage as an educational tool. Each lesson is self-pacing, interactive, and dynamic. It is not like reading a book; you literally talk back to the computer as you learn. You can progress as fast or as slow as you wish. Graphics, animation, and readability make this approach to learning BASIC fun.

During each lesson, there are quick tests to help you gauge your progress. Unlike written tests, the computer will explain why a particular answer is wrong. At the end of each lesson, and before each test, the program will ask if you wish to repeat the last lesson.

The Lessons

The BASIC Course consists of eight Lessons and an Introduction. The Introduction explains how to load and use each Lesson. Some Lessons are made up of smaller sub-segments, such as LESSON1, L1P2 (Part 2 of Lesson 1), L1P3 (Part 3 of Lesson 1), L1P4 (Part 4 of Lesson 1), etc.

Each Lesson or sub-segment may be studied or reviewed at any time. To stop a Lesson, or go to a sub-segment, press the **BREAK** key. When **READY>__** appears, type **C L O A D** and the name of the desired lesson or segment. After the computer has loaded the lesson or segment, **READY>__** will appear again. Type: **R U N** and press **ENTER**. You must press **ENTER** after responding to questions that appear on the screen.

Lesson 1

Lesson 1 (Beginning BASIC) is essentially your introduction to the world of computers. It explains the way BASIC works, the use of line numbers, and how BASIC programs are structured. Loading instructions and their contents are as follows:

C L O A D " L E S S O N 1 " ENTER

Introduction
LIST
PRINT
CLOAD

Line Numbers
Variables
NEW

INPUT
Line Editing
Tape Storage

C L O A D " L 1 P 2 " ENTER

PRINT Spacing
Expressions
PRINT TAB

PRINT@
Hierarchy
Strings

END
LET

C L O A D " L 1 P 3 " ENTER

IF/THEN

GOTO
DIM

CLOADL1P4 ENTER

ABS
GOSUB/RETURN
RESTORE

INT
ON...GOSUB

RND
ON...GOTO

Graphics Statements:

SET

RESET

POINT

Lesson 2

Lesson 2 shows you how to make changes to programs, using the Editing functions and the Editing commands. Lesson 2 also covers shortcuts in Editing that let you make changes quickly and easily.

CLOADLESSON2 ENTER

Using Edit
SPACE BAR
SHIFT UP ARROW
H ack
C hange
Q (quit and exit)

LIST
D elete
CURSOR MOTION
X (end of line)
L ist edited line
E (save and exit)

EDIT
I nsert
S earch
K ill
A (cancel)

Lesson 3

Lesson 3 covers the different types of variables and variable names allowed in BASIC. The lesson explains in detail how to use the most efficient type of variable for any application. Lesson 3 also examines the use of arrays to hold large quantities of related information.

CLOADLESSON3 ENTER

Integer
Double Precision
Arrays

Single Precision
Strings
DIM

Exponential Form
Type Declaration

Lesson 4

Lesson 4 details the use of BASIC Operators and Commands. The operators (arithmetic and logical) and their use are explained in full. The BASIC Commands are listed and explained.

C L O A D " L E S S O N 4 " ENTER

Operators

Arithmetic Operators:

Addition

Division

Subtraction

Exponentiation

Multiplication

Grouping

Relational Operators:

Less Than

Less Than or Equal

Greater Than

Greater Than or Equal

Equal to

Not Equal to

Logical Operators:

True Expression

OR

False Expression

NOT

AND

String Operators:

Less Than or Equal

Greater Than

Not Equal to

Operator Hierarchy

Commands

AUTO

CLOAD?

CONT

CLEAR

CLOAD

SYSTEM

CSAVE

STOP

TRON/TROFF

Lesson 5

Lesson 5 explains how to enter and store data, and retrieve it. Saving data on tape for later use is covered in detail.

C L O A D " L E S S O N 5 " ENTER

INPUT	Input/Output (I/O) Statements	
INP	INPUT#	INKEY\$
PRINT@	READ	PRINT
LPRINT USING	PRINT USING	LPRINT
# Field Specifier	PRINT#	OUT
! and % Field Specifiers		

C L O A D " L 5 P 2 " ENTER

Input/Output (Cont.)	LPRINT	LPRINT USING
LLIST	Cassette Data Files	PRINT#
INPUT#	INP	OUT
INKEY\$		

Lesson 6

Lesson 6 explains how to manipulate text strings and use them for comparisons and logical operations.

C L O A D " L E S S O N 6 " ENTER

String Functions:

ASC	CHR\$	FRE
LEN	LEFT\$	MID\$
RIGHT\$	STR\$	STRING\$
VAL		

String Operations:

ASCII Codes	ASCII Function	CHR\$ Function
Relational Operators	LEFT\$ Function	MID\$ Function
RIGHT\$ Function	LEN Function	VAL Function
STR\$ Function	FRE Function	

Lesson 7

Lesson 7 details the special features of Model III BASIC and how to use these features.

C L O A D " L E S S O N 7 " ENTER

? (PRINT)

NEXT

ON ERROR GOTO

ERR Function

' (REM)

Ending Quotes

RESUME

ERL Function

Compact Lines

Lesson 8

Finally, Lesson 8 completes the course with a section on machine language subprograms that are called from a BASIC program.

C L O A D " L E S S O N 8 " ENTER

Machine Language

POKE

SYSTEM Command

USR Function

PEEK

VARPTR Function

Loading the Lessons

It is assumed you have reviewed the general operational procedures for your equipment as explained in the Model III Operation and BASIC Language Reference Manual and are now aware of how to power on your computer, load tapes, etc.

1. Turn on the system. If you are not familiar with the Model III System, please refer to your Model III Operation and BASIC Language Reference Manual for System Start Up (Power Up Sequence).

2. The screen will show:

You type:

Cass?

[H] and press **[ENTER]** .

Memory Size?

Press **[ENTER]** .

READY>__

[C][L][O][A][D][][I][N][T][R][O][]
and press **[ENTER]** .

After the lesson has loaded into the computer, READY>__ will appear again.
Type: **[R][U][N]** and press **[ENTER]** .

The Introduction has detailed instructions on using the program and loading the lessons.

IMPORTANT NOTICE

ALL RADIO SHACK COMPUTER PROGRAMS ARE LICENSED ON AN "AS IS" BASIS WITHOUT WARRANTY.

Radio Shack shall have no liability or responsibility to customer or any other person or entity with respect to any liability, loss or damage caused or alleged to be caused directly or indirectly by computer equipment or programs sold by Radio Shack, including but not limited to any interruption of service, loss of business or anticipatory profits or consequential damages resulting from the use or operation of such computer or computer programs.

NOTE: Good data processing procedure dictates that the user test the program, run and test sample sets of data, and run the system in parallel with the system previously in use for a period of time adequate to insure that results of operation of the computer or program are satisfactory.

RADIO SHACK SOFTWARE LICENSE

A. Radio Shack grants to CUSTOMER a non-exclusive, paid up license to use on CUSTOMER'S computer the Radio Shack computer software received. Title to the media on which the software is recorded (cassette and/or disk) or stored (ROM) is transferred to the CUSTOMER, but not title to the software.

B. In consideration for this license, CUSTOMER shall not reproduce copies of Radio Shack software except to reproduce the number of copies required for use on CUSTOMER'S computer (if the software allows a backup copy to be made), and shall include Radio Shack's copyright notice on all copies of software reproduced in whole or in part.

C. CUSTOMER may resell Radio Shack's system and applications software (modified or not, in whole or in part), provided CUSTOMER has purchased one copy of the software for each one resold. The provisions of this software License (paragraphs A, B, and C) shall also be applicable to third parties purchasing such software from CUSTOMER.
